EDUCATION

Appalachian State University, Boone, NC
Bachelor of Science in Computer Science
Concentration: Data Collection

Anticipated graduation 2025

RELATED COURSEWORK

Software Engineering
AGILE and SCRUM environments
Java
Data Collection
C, C++, C#

Python
Node.js
Assembly Language
Data Management & Statistics with R
Haskell

EDUCATIONAL EXPERIENCE

Soft Gel Pills

- Collaboratively engineered a java-based point of sale (POS) system for a pharmacy within a multidisciplinary team of four computer science students, employing advanced methodologies including pair, programming and SCRUM framework
- Used GitHub to streamline collaboration and a chat service (discord) to organize and plan our project to ensure a very smooth collaboration and learn how to work together as a team to increase code, quality and efficiency
- We used a test first organization system where we wrote comprehensive tests to test the output of each program exactly before we wrote each program. We broke up the project into April sprints with rotational roll assignments and worked through each one

Y86 Processor

- Developed a Y86 processor emulator in C++, enabling accurate simulation of its instruction set and architecture
- Implemented a functional pipeline to replicate the processor's fetch-decode-execute stages, enhancing understanding of low-level hardware operations
- Validated the emulators accuracy through comprehensive testing, contributing to a deeper grasp of computer organization and architecture principles

Python Web Scraper using Scrapy

- Developed a web scraper that used a spider to crawl through a retail website and put different data points from each item page into a data matrix
- Used data matrix to generate a new potential item, generated using some statistical calculations
- Honed data collection and analysis processes through many conversations with my professor

Web Page Design

- Collaborated within a team to conceptualize and develop a webpage based on high-fidelity wireframes.
- Utilized collaborative tools such as Miro to efficiently craft wireframes and facilitate seamless communication among team members.
- Demonstrated punctuality in delivering the finalized web page within established timelines.

EXPERIENCE

Mellow Mushroom, Boone, NC

Jun. 15, 2020 - Present

Pizza Maker, Exposition, Grill, Prep Cook, Salads, Dishwasher, Maintenance

- Work efficiently in fast-paced environment
- Work within corporate and managerial standards to provide high-quality food
- Manage daily revenues exceeding \$1000
- Train 3-5 employees per month

Poolside Grill at McConnell Golf Country Club

May 21, 2018 - August 21, 2018

Fry Cook, Food Prep, Register, Closing

- Provided excellent customer service to ensure a pleasant experience
- Worked efficiently
- Recorded/organized inventory

Food Services at Appalachian State University

Sept. 15, 2017 - May 15, 2020

Stir-Fry Chef, Cafeteria serving line, Food Prep, Closing, Register
